

CURRICULUM VITAE

DAVID JONES

CAREER AND PUBLICATION SUMMARY

David Jones is a postdoctoral researcher based at the Instituto de Astrofísica de Canarias on the Spanish island of La Palma. He has also worked at the European Southern Observatory's Paranal Observatory in Chile, the Universidad de Atacama, the Isaac Newton Group of Telescopes, and the Jodrell Bank Centre for Astrophysics. To date, he is the author of 45 refereed papers in leading scientific journals, including both *Science* and *Nature*. He is the first author of 10 of these papers, and in the first three authors of a further 15. Additionally, he is the author of more than 30 non-refereed publications, ranging from book chapters and conference papers to articles for the *ESO Messenger*. In total, his papers have garnered more than 1050 citations, resulting in a Hirsch index of 21 and a Research Impact Quotient (riq) of 150.

TEACHING EXPERIENCE

2018	Lecturer/tutor at “Physics of Eclipsing Binaries Workshop” - June 18-22 2018 in Villanova, USA
2015	Lecturer/tutor at “Awareness 2015 - An ESO/OPTICON/IAU summer school on modern instruments, their science case, and practical data reduction” - Sept. 1–11 2015 in Brno, Czech Republic
2014–2014	Undergraduate lecturer in Física 1 (Physics 1) at the Universidad de Atacama, Copiapó, Chile
2009–2010	University of Manchester 3rd and 4th year undergraduate astrophysics laboratory experiments demonstrator - including night observing with a 10” Schmidt-Cassegrain optical telescope.
2008–2009	Demonstrator and marker for University-accredited Jodrell Bank Observatory distance learning course, involving supervising the use of one of the research radio telescopes.
2007–2008	Demonstrator in 2nd year undergraduate physics laboratory, University of Manchester

STUDENTS

Alex Brown	2017–present: ING student project supervisor. Project entitled “A detailed study of barium stars in planetary nebulae”, forming part of undergraduate masters programme at University of Sheffield, UK. First peer-reviewed paper submitted.
Paulina Sowicka	2015–present: PhD project co-supervisor (home institution CAMK, Warsaw, Poland) “A zoo of variable planetary nebula central stars”. Defence due September 2019. Three peer-reviewed journal papers published.
Amy Tyndall	2011–2014: PhD project co-supervisor, thesis entitled “A Study of Planetary Nebulae Possessing Binary Central Stars”. Two peer-reviewed journal papers published. Successfully defended thesis March 3 rd 2014.
Martha Tabor	2012–2012: ESO Internship project supervisor, project entitled “Accurate photometry of PN central stars by difference imaging”. Currently undertaking a PhD at the University of Nottingham.
Leo Huckvale	2009–2010: MPhys project supervisor. Project investigating the kinematics of planetary nebula Abell 65, the results of which were published in MNRAS.

RELEVANT EXPERIENCE

- Three years spent as an ESO fellow with duties at the Paranal observatory. This included responsibilities as both day astronomer (executing calibrations, performing quality control checks and interfacing with the day time engineering team with duties related to all four 8m Unit Telescopes as well as two survey telescopes and the VLT Interferometer), and as night astronomer (executing observations and supporting visiting astronomer on both Unit Telescope 1 and Unit Telescope 2). Furthermore, I was Night Shift Coordinator on several occasions, meaning I was responsible for the night time operation of all four Unit Telescopes and two survey telescopes under the “SciOps 2.0” scheme, whereby each night astronomer would work a hybrid day-night shift, leaving the final hours of each night to the Telescope Operator and the Night Shift Coordinator.
- A wealth of personal observing experience at a variety of highly competitive international facilities, as well as associated data reduction and analysis. Experienced with, for example, high spectral-resolution spectroscopy (using both echelle and Fabry-Perot spectrometers), extraction of aperture photometry, Lomb-Scargle periodicity analysis, reduction of both stellar and nebular spectroscopy (at a range of wavelengths and resolutions), cross-correlation of stellar spectra. Primary tools employed being astropy and its affiliated packages, and the STARLINK data reduction suite, but also familiar with IRAF/PYRAF. Good working knowledge of PYTHON, PERL, BASH, FORTRAN, L^AT_EX and unix-based operating systems.
- Co-chair of the “Deaths of Stars, Lives of Galaxies 2013” ESO workshop attended by more than 90 people. Co-chair of the “Transient and Time Domain Astronomy: Robotic telescopes, surveys and the evolution of transient phenomena” session at the Royal Astronomical Society’s National Astronomy Meeting 2016, Nottingham. Invited speaker at multiple international conferences including International Astronomical Union Symposium 323: “Planetary Nebulae: Multi-Wavelength Probes of Stellar and Galactic Evolution”. Elected to the organising committee of IAU commission H3: Planetary Nebulae in 2018.
- Referee for ApJ and ApJS since 2013, MNRAS since 2014, and Nature Astronomy and Galaxies since 2018. Expert Reviewer (2012) for grant applications to the Polish National Science Centre (Narodowe Centrum Nauki).
- Multiple invited stays at international research centres, most recently Nicolaus Copernicus Astronomical Centre (Warsaw, Poland) and Katholieke Universiteit Leuven (Belgium).
- Principal Investigator for the Instituto de Astrofísica de Canarias (IAC) in the ERASMUS+ Strategic Partnership “Per Aspera Ad Astra Simul” awarded 288 000€ to promote the exchange of staff and students between the IAC and partner institutes as well as the organisation of multiple international summer schools. This pioneering project will also see the first GTC studentships, with PhD students offered the possibility to spend several months in training at the GTC, learning the day-to-day operational duties undertaken by GTC staff.
- Wide-ranging outreach experience. Experienced in conveying scientific concepts and astronomical research to the general public, including children. Numerous press releases, TV interviews, podcast interviews, talks to schools and amateur astronomical societies. Appeared via video link at Jodrell Bank Live music festival and performed stand-up comedy outreach at Bright Club Manchester in 2012. Won STFC funded event “I’m a Scientist, Get Me Out of Here” Extreme Energy Zone, June 2014.
- Native English speaker, fluent in Spanish.
